

Are you ready for Industrial IoT? You can do with us!

Industrial Gateway for IQRF DPA Networks

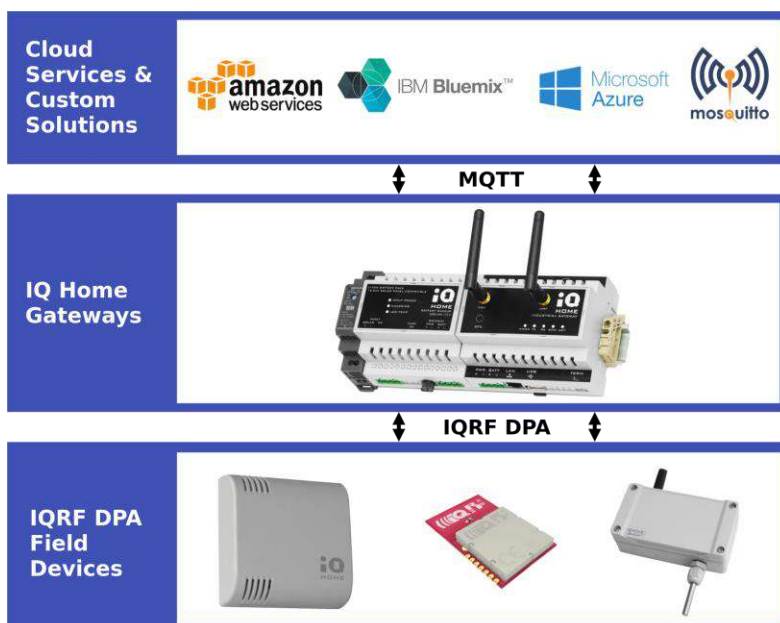

Overview

The IQ Home Industrial Gateway is bridge the gap between IQRF DPA devices in the field and the Cloud in the easiest way.

The IQ Home Gateways are ready to use. All you need to do is set cloud parameters in the gateway and bond IQRF DPA end devices with IQRF IDE.

The gateway services hides the complexity of the IQRF DPA network communication away from the users. Save time with easy setup and connect your gateway quickly to the Cloud.

Industrial Design

- High reliability
- Extended temperature range
- Li-ion battery backup
- Redundant data storage
- Redundant network connection: Ethernet + Integrated 4G LTE

Ready for IQRF Alliance

- 100% IQRF DPA Compatibility
- Compatible with all IQRF Alliance interoperable end devices
- Transparent IQRF DPA messages
- IQRF OS v4.02 support

Cloud support

- Easily connect to Cloud via MQTT with JSON protocol
- Remote management via MQTT
- OTA update

Customizable

- Integrated Node-RED support
- Custom user application via simple UDP JSON protocol
- IQ Home Link It™ management tool
